Did you know?

You can migrate, design, maintain & develop any workload – applications, websites, databases, storage, physical or virtual servers – and even entire data centers from an on-premises environment, hosting facility, or other public cloud to AWS

Every step along the way, you can leverage AeonX's years of experience with a team of 250+ SAP Certified Consultants and AWS Cloud Developers, Architects, & Administrators with over 30 million+ hours of combined consulting experience. Additionally, we have access to a trusted network of 700+ consultants to support scalability. With 7 years of consulting experience, we offer expertise in SAP and AWS cloud solutions.

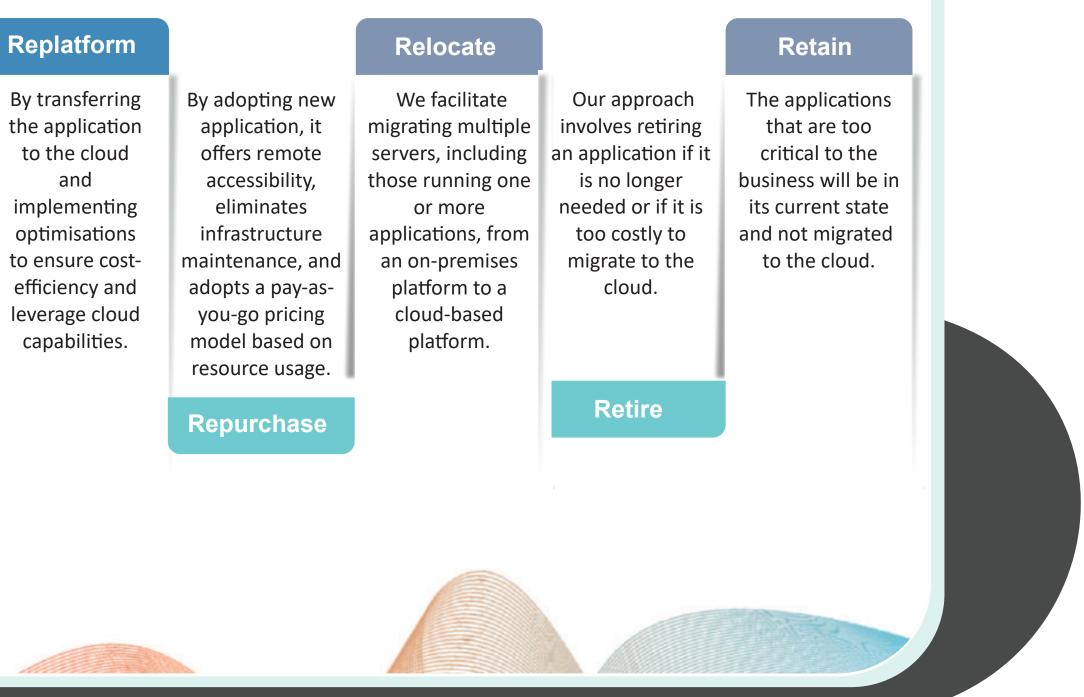

Cloud journey with AeonX towards a better future:

Rehost

This rehosting process involves "lifting" the application from its current environment and "shifting" it to the cloud without altering its code or architecture.

We modify codes to optimize an application or the cloud and utilize cloudnative services like serverless computing.

Refactor

Become a Future-Ready Intelligent Enterprise With AeonX

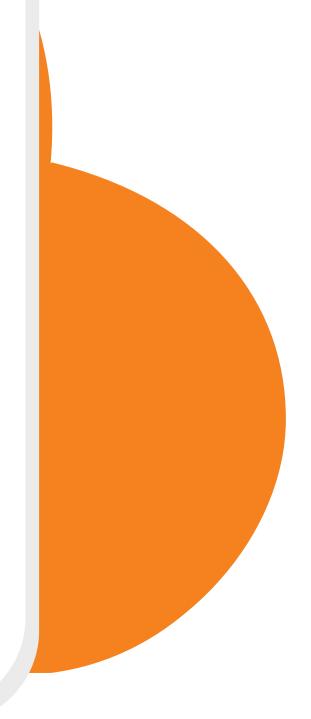

Public Sector
AWS Lambda Delivery
SAP Services Competency
Amazon DynamoDB Delivery
AWS Systems Manager Delivery

 Well-Architected Partner Program
Supply Chain Services Competency

Application Development:

Easy end-to-end integration with other SAP systems Security

Advanced security measures, such as encryption and access control, to safeguard sensitive data Collaboration

Collaborative environment to enhance team effectiveness, streamline development.

Innovation

Access to advanced technologies like AI, machine learning, and loT for creating innovative apps that fuel business

Scalability

Offers a flexible and scalable platform for developing applications that can adapt to evolving business needs.

GenAX by AeonX Digital revolutionizes workflows with automation, predictive analytics and Al-driven insights.

From content creation to seamless SAP integration, it boosts efficiency, enhances engagement and unlocks new opportunities.

Transform your business with GenAX today!

Xpense is a cloud-based SaaS solution that simplifies business expense processes.

It offers easy trip request creation, quick expense entry from bills, and streamlined approval setup via an app and web portal with ERP integration.

Ideal for employees and finance teams.

ITD CEMENTATION Case Study- RISE WITH SAP ON AWS

ITD CEMENTATION INDIA LIMITED has been operating in India for over 8 decades and has established its process across multiple lines of business such as Maritime Structure, Highways, Bridges and Flyovers, Airports and more. Being in the manufacturing industry, they had a lot of requirements of day-to-day reports which was presented to the management.

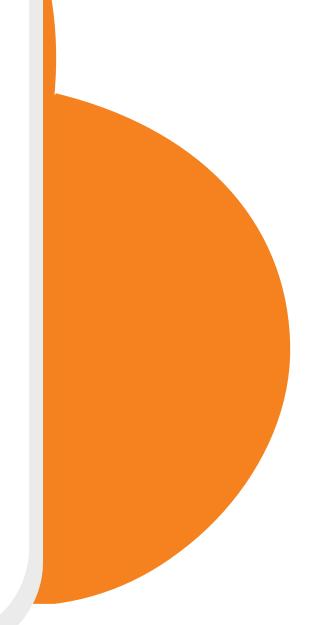

Pain Point ITD Cementation was operating their business using SAP S/4HANA 1709 hosted on an onpremise infrastructure. They were looking to adopt digital transformation in their enterprise to improve operational efficiency. As their infrastructure was onpremise, they wanted to migrate it to the cloud during the transformation process. 33

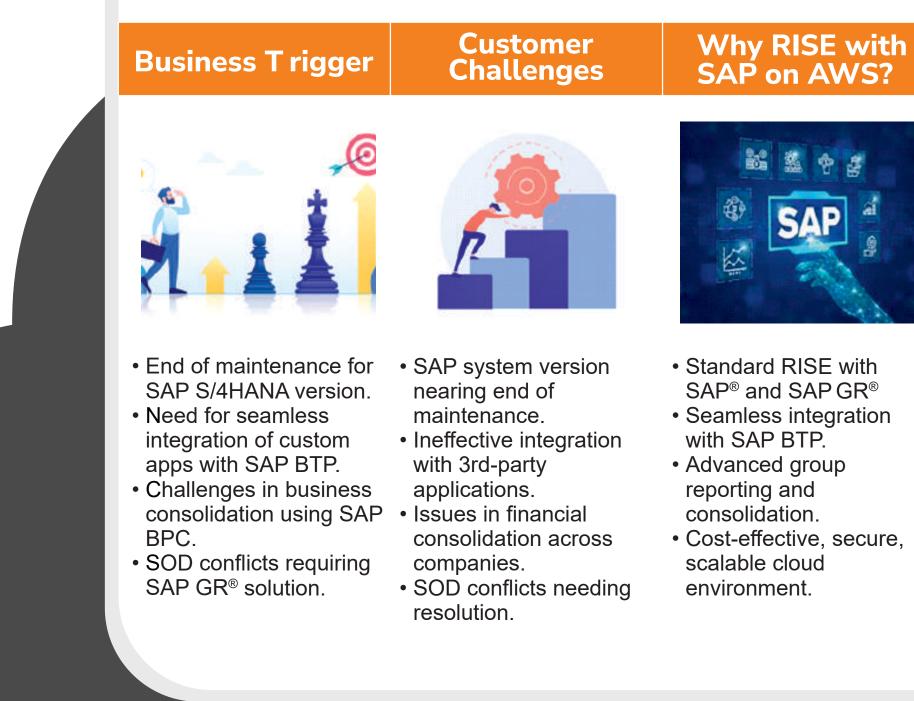

migrating its SAP system and we recommended the RISE with SAP solution hosted on AWS. Our approach involved employing the lift and shift migration strategy, alongside an upgrade, to migrate the system from on-premise to RISE with SAP. They also migrated their remaining non-production systems to an AWS environment in a SAP hybrid architecture.

ASHAPURA CASE STUDY - RISE with SAP on AWS

Results
